

Introduction

idRisk is a network of specialised, independent risk advisors who are regarded as experts in their respective fields and who can provide customers with comprehensive, high quality unbiased advice on, and solutions to, all aspects of risk a company may encounter.

Our Risk Advisor Group has the experience and expertise to provide organisations with independent professional support and advice to help senior Managers fulfil their duties.

The Issue

Tighter legislations and a growing demand for companies to demonstrate a detailed understanding of their risk profile and appropriate action plans has put enormous pressure on organisations and their Senior managers. Full time Risk Managers may not be justified but the need of interim or project driven risk management often exists.

Companies face a number of difficulties:

Lack of information or knowledge

- ⊙ There may be gaps in the risks the company has identified as well as the control mechanisms and the audit processes. Organisations may not understand the true nature of the real risks. The tools to optimise an organisation's risk/benefit position are not available. Organisations may be using unnecessarily expensive risk transfer mechanisms.

Unrealistic workloads

- ⊙ Managers often have unrealistic workloads and simply cannot keep on top of the information required to ensure risks are properly managed and costs are controlled

Lack of Independent and Reliable Advice

- ⊙ Access to unbiased, independent advice is often difficult to find.

The Solution

The Risk Advisor Group has a huge resource of expertise available to help companies and their Risk Managers to improve all aspects of risk management and risk financing, at a competitive price.

The Services

- ⊙ Independent audit of risk management structure
- ⊙ Risk financing
- ⊙ Broker selection criteria
- ⊙ Risk management check-list
- ⊙ Claims management
